7 years experience with various permutations of Agile development practices.

Experience

Entrepreneur/Web-developer | jellobrain.com | 1998 – current
My business, jellobrain, has morphed over the years, but has consistently focused on web and technology applications for non-profit organizations and acting both as an advisor and as a full spectrum web development shop.

Technical Lead | TechSoup Global | 2010 - 2012
Technical Lead for a distributed global team of developers and stakeholders developing a social network platform on drupal that enables non-profit organizations and activists to access technology and development projects/money. Also maintain and develop other platforms for the organization.

Web Developer / Advisor | Alternate ROOTS | 2009 - 2011
Developed and designed, from the ground up, a multidimensional web application / data management system for the organization using drupal, and acted in an advisory role once development stabilized.

Director Information Technology | Southern Center for Human Rights | 2007-2009
Developed virtual office website on drupal for collaboration between a distributed team of lawyers and organizers. Also developed their main website and manged the implementation of their development database.

Project Manager | ifPeople | 2007- 2008
Served as a project manager for distributed team developing custom web applications using Plone.

Volunteer Project Manager | United States Social Forum | 2006 - 2007
Served as a project manager for distributed team developing event management systems, registration systems and website for the United States Social Forum.

Database Specialist | Institute of American Indian Arts | 2006 - 2007
Managed, implemented and organized a wholesale conversion from a legacy Matriculation and Data Management Systems to an Oracle-based system (EMPOWER).

Information Systems Designer | Bioneers | 2004 - 2006
Managed, implemented and organized a wholesale conversion from a legacy FileMaker Event Management and Organizational Data Management Systems to a custom web-based drupal/CiviCRM implementation. Managed the development of first ever CiviNode module (drupal).

Assistant Dean | EcoVersity | 2002 - 2004
Aided in the running of a small vocational school that taught environmentally aware and sustainable technologies. Helped develop curriculum, manage databases and mastered website.
